The Unfinished Obelisk lies, in its original location, in a granite quarry in Aswan. It is 42m in length and was most probably abandoned when some cracks appeared in the rock, during its construction. Had this obelisk been completed, it would have been the heaviest obelisk ever cut in Ancient Egypt, weighing nearly 1100 tons! It is believed that it was constructed and abandoned during the reign of Queen Hatshepsut (18th Dynasty).

During the earliest ages, the Ancient Egyptians knew the so-called "Pn-pn", which was a pyramidal stone with a pointed top and according to their beliefs the "Pn-pn" symbolized the primeval hill from which the world first appeared. Then, in the course of time, this Pn-pn evolved to be an obelisk usually made of granite with a pyramidal shape on top.

Philae Temple

Philae Island was a rocky island in the middle of the River Nile, south of Aswan. It was called in Hieroglyphic "Apo" which means Ivory. It was also known by the Greek "Elephantine", most probably because it was an important centre of trade, especially for ivory

The Ancient Egyptians built a beautiful and magnificent Temple on this island for the Goddess Isis, but the Temple became submerged after the first Aswan dam was built in 1906, and it was not until the seventies that many nations attempted to save the Temple

This was a secret place, where sentries were placed at the entrance of the Valley, as well as along the top of the hills, in the hopes of discouraging tomb robbers, who had in the past plundered all royal tombs, including the treasures of the Pyramids!
